## EDUCATION

### - ASAC-LTUC, Amman, Jordan

April 11<sup>th</sup> 2021 - October 21<sup>th</sup> 2021

I had a very extensive web development course during those six months, where I had to deal with too many software development platforms, mainly ReactJs, Redux, NodeJs, Rest APIs and SQL databases.

### - Yarmouk University, Jordan — Bachelor of Informatics Engineering

August 2014 - June 2020

In Yarmouk University I had to be enrolled in different programming courses such as C++ where I got introduced to and fell in love with the programming world, DBMS where we dealt with SQL and structured databases and data structure and algorithms where I start to hate programming.

## EXPERIANCE

12/2021 – CURRENT

### SOFTWARE DEVELOPER AND TA, LTUC

Worked with development and academic teams as I was a software developer with some projects and I was an instructor assistant to give a help to the students and trainees.

Please check out my [Portfolio](#)

## PROJECTS

### My Workshop — Nov, 2022 - Jan, 2023

The Workshop Dashboard is a web application designed to provide an intuitive interface for managing user data, products, and transactions in a workshop environment. It serves as a centralized platform for administrators to perform CRUD operations seamlessly. And here is the website [GitHub](#) link.

### Comics — Jul, 2022 - Aug, 2022

*In this project we created a CRUD full stack React app that deals with two different APIs to retrieve data for movies, comics and cartoon's characters to show to the user where he can add, delete or update any movie, comic or character to his favorite list after logging in to his account in the webpage. And here is the webpage live URL: [Comics](#) . [GitHub](#)*

### React Animation — Aug, 2023 – Present Day

*A collection of stylish and customizable CSS3 animations and React components to enhance the visual appeal of your web applications. Whether you're building a dynamic website or a sleek web app., live URL: [Animation](#). [GitHub](#)*

## SKILLS & Tools
