Education

Master D. in Computer Engineering - Yarmouk University Oct 2023 – Present

To deepen my expertise and fuel my passion for the field. This advanced education will allow me to explore cutting-edge technologies and dive into complex problem-solving, helping me gain a comprehensive understanding of modern computing systems and their applications.

International Diploma in Web Development - ASAC-LTUC April 2021 - Oct 2021

Very extensive web development course, where I had to deal with software development programming languages and platforms, mainly JavaScript, Typescript, HTML, CSS, React.js.js, Redux, Node, Rest APIs and SQL databases.

Bachelor D. in Biomedical Informatics Engineering - Yarmouk University Aug 2014 - June 2020

Enrolled in different programming courses such as C++, data structure and algorithms where I got introduced to and fell in love with the programming world, and DBMS where we dealt with SQL and structured databases.

Professional Experience

Frontend Developer | Digital Gates | Amman Dec 2024 - Present

- Collaborates effectively with design and development teams to deliver high-quality digital experiences.
- Employing HTML, CSS, TypeScript in React.js and its framework Next.js.
- Experienced in building responsive, user-friendly, and visually appealing web applications.

Software Developer | LTUC-ASAC | Amman Dec 2021 – Oct 2024

- ASAC is the development division in LTUC college, considered to be the best in its field.
- Worked on staff management system project as a full stack developer (Reaact.js, Node.js).
- Developing and managing discord channels for courses and students.
- Interviewing possible candidate students for scholarships.

Front-End Developer Intern | Atypon | Amman June 2022 - Sep 2022

- Atypon develops publishing technologies into the hands of the practitioners and researchers who need it most.
- Got introduced to semantics hypertext markup language best practices with HTML5.
- Applied the concepts of web content accessibility principles (POUR) and search engine optimization (SEO) into various applications.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, JSX, HTML5, CSS3, SCSS.

UI & State: React Hooks, context, reusable components, responsive design, Material UI.

Backend & Tools: Node.js, Express.js, REST APIs, SQL, MongoDB, Git, GitHub, familiar with C# & .Net

Practices: Web accessibility (POUR principles), SEO fundamentals, cross-functional collaboration.

Selected Projects

- PR Hub – Pull Request Management Platform | React.js, JavaScript/JSX, REST APIs
  - Independently developed a platform for managing pull requests and projects with developer and admin interfaces.
  - Built a Kanban-style dashboard with pull-request status tracking, search, filtering, and navigation.
  - PR and project management pages, reusable React components, and form-based workflows using React Hooks.
  - Developed backend API endpoints from scratch and integrated them with the frontend for dynamic data operations.
- React Animation a collection of stylish and customizable CSS3 animations and React components to enhance the visual appeal of your web applications - GitHub.
- Four Boxes simple clicking game to test your focus and concentration - GitHub.
- Restaurant Chain an SPA to manage a chain of restaurants (CRUD ops) with a backend server (DB) - GitHub.
